BEFORE AND AFTER EVERY DIVE

Annual maintenance stays lab work.
These are the checks you can do yourself.

Before

O-ring

Check the o-rings:
no cracks,
no foreign objects

Grease

Lubricate with
silicone grease

Test

Do the vacuum test
(if you bought one)

Closure

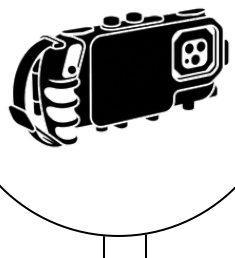

Check that the rear
is closed all the
way round

After

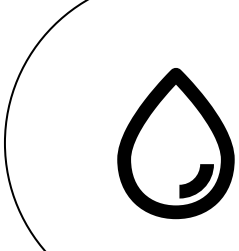

Rinse

Rinse with
fresh water,
always

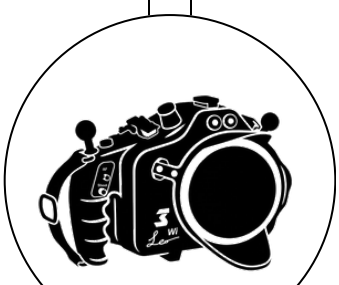

Wait

Wait for it to cool
and for the pressure
to equalise

Dry

Dry it well,
especially around
the o-rings

Protect

Don't leave the
housing closed
in direct sunlight
for long periods
